2. The following matters were also discussed:

- a. The role of the liberation Committee – It was the feeling of members present that the liberation Committee and the liberator should only have control of the liberating of the birds once they reach the race point. The liberator is also in charge of the birds once they are in transit and until such time they are liberated. Any other matters relating to basketing and the birds reaching the race point are to be controlled by the President and Secretary of the Federation.

- b. It was also discussed that basketing takes place on night of basketing as per schedule regardless of the weather condition on that basketing night and then if the birds are not liberated by the Sunday they are to be returned. If an extreme weather condition is predicted by the Weather Bureau the President and Secretary can cancel that weekend race.

Please note both 2a & 2b are only suggestions put forward and would need to be clarified more deeply at the AGM.
