

# **Race Teams for Sale**

## **NexGen Van Loons**

Orders for a limited number of ten bird race teams are now being taken for the **2021** season. Young birds off this very successful Van Loon based family have recorded many wins and places at both Club and Federation level for fanciers in many states of Australia (Qld. NSW, Vic, WA and TAS). They are renowned as being great performers in one day middle distance races having won Young Bird Nationals and All Age Nationals in three different Federations, along with winning a Federation Bird of the Year Award (CCF), an Ace Bird Award (presented by the ARPJ) and a bird to win Bird of the year in the MNCF.

This family has proven their versatility by having performed for many different fanciers living in both capital cities and in regional areas, racing under various conditions and training methods.

Each year I have strived to improve this family of birds by selectively breeding for stock, along with introducing carefully selected birds that carry the Van Loon/Janssen bloodlines. Continuous improvement is what I always try to achieve, always looking to produce that better bird.

Last year I didn't have to advertise teams for sale as I received many early orders from previous fanciers that had success with prior purchases. This year I am advertising teams for sale earlier than I normally do to give other fanciers the opportunity to order a team and try them for themselves. Due to other commitments towards the end of this year I will need to be finished my breeding program earlier than normal.

Anyone wishing to improve their race performance in the short to middle distance events, or wish to try these "NexGen" Van Loons in their stock loft should consider ordering a team early to avoid disappointment.

**Teams of 10 birds will be for sale at \$600.00 plus freight**

**(Birds to Sydney at no freight cost, delivered to a central pick up location)**

**Stock birds will paired early August**

**To order your team please contact Paul Gibbs on Mob 0408 003 387 or (02) 6559 5925 or by e-mail at [pigeon52@bigpond.net.au](mailto:pigeon52@bigpond.net.au)**
