Davistown: Have discovered that to install tow-Bar would require extensive strengthening of the subframe, including engineering works. In view of the costs required and the intended use of the new transporter for tossing the addition of a tow-bar has been placed on hold, pending further enquiries. Enquiries regarding Bull-Bar are continuing.

Davistown members to remove wires of baskets left in transporter and dispose of baskets.

Budgewoi: Paul Holtz advises that it will be necessary to remove the centre post of baskets, to allow easy access to cleaning. Previously agreed that strengthening of top rail to allow removal of middle post needed for protection of birds.

Hunter : Sought confirmation that wire floors are included with Basket purchase.
